## Death Records

Death records are some of the best records a genealogist can find. I hope this issue dedicated to the records that are available online or otherwise have been sent to me helps you in your genealogy research.

Many of these records will have extra items included. I have taken these listings

from databases available to us other than the Social Security Death Index. It is common knowledge that the SS Death index isn't a complete listing, it only lists a person if there was a death benefit paid.

It is my hope that these valuable records will help you with your research in some way.

Later newsletters will include more vital records, census records and other source documents that will help in further research.

If you know of other available records that I should know about to include in future publications, please

email me with that information. Kee46@msn.com

As always, I am interested in any news worthy article about a family member that anyone wants to share.

Happy Hunting!

Adrienne Hopkins

PS: I have had to vary the font size in order to get some of the records to stay grouped together properly. My goal was to use a 12 pt. Font in most of the newsletter for easy reading. In some areas I had to use 10 pt. I felt it was better to adjust the size rather than to do the whole newsletter in the smaller font.

## Georgia Death Records from 1919 -1998

### Description:

This database is an index of more than 2.7 million deaths recorded by the state of Georgia from 1919 to 1998. Georgia's registration of births and deaths on the state level began in 1919. The index includes the name of the deceased, the volume of the certificate number, the death date, the race of the deceased, the deceased's gender, the county of death, the death certificate number, the date the certificate was filed, and the deceased's age.

## Kentucky Death Records

### Description:

This important database contains an index to more than 2.6 million death records of individuals living in Kentucky from 1911 on. All records contain the following information: name of the individual, date of death, county of death, county of residence, age at death, and volume and certificate number. This database is an update to the previous Kentucky Death Index; the update adds the years 1997 through the present.

### What Do I Do Now?

Death certificates for Kentucky can be obtained from the Kentucky Department for Public Health at the following address:

## Alabama Death Records

This database is an index of deaths recorded by the state of Alabama from 1908 to 1959. The registration of births and deaths on the county level began in 1881; however, state-level registration of deaths in Alabama did not begin until 01 January 1908. The index includes name of the deceased, county of death, date of death, and the state certificate number (volume and page). This database will prove useful to those seeking Alabama ancestors.

### Extended Description:
